Lack of parking a problem, no end in sight

By DONALD MUNRO
Staff Writer

It was a Wednesday night about 8 p.m., and the library parking lot was almost full. It had reached the point where the driver of the blue Honda Civic decided to wait until someone walked out of the library and follow them to their parking space — an infuriating situation for most Cal Poly students.

Faculty are also upset with parking

By JULIA PRODIS
Staff Writer

Students are not the only ones upset about the lack of parking on campus — the faculty is angry, too.

So angry, that they have proposed a resolution to solve their parking problems through the Academic Senate, which is composed chiefly of faculty members. Authored by associate professor and head of the philosophy department, Talmage Scriven, the *Resolution on Parking* reads as follows:

WHEREAS, The lack of parking spaces available to faculty discourages them from utilizing university facilities, causes them to be late in meeting classes and causes them to be in a poor state of mind if and when they do make it to class on time, be it therefore

RESOLVED, that the President direct the appropriate authorities to create additional faculty staff parking spaces as soon as possible, and be it further

RESOLVED, that the appropriate authorities be directed to tow away vehicles which are illegally parked in faculty staff parking spaces, created from among the existing parking spaces on campus.

"This is a very serious problem for us," said Scriven. He said that if one faculty member is late for class, it inconveniences 30 or 40 students, whereas, if one student is late for class, it does not inconvenience the class as a whole.

"I've had a few obscene gestures made to me (in the parking lot) and I've made a few myself," said Scriven.

Student Senate representative to the Academic Senate, Scott Delaney, reported in Wednesday night's Student Senate meeting that the faculty proposed stationing guards at the faculty parking spaces and installing devices to blow up the tires of students who park in faculty spaces. Though these suggestions were made in jest, Delaney said that faculty members were very dissatisfied with the current parking situation.

When a woman walked out of the library toward her car, the driver followed slowly behind. What the driver of the Civic didn't see was the white Ford pick-up truck with a utility bed and lumber rack that was sitting at the other end of the lot, just waiting to pounce on the same parking space.

Luck was with the Civic, and when the woman's car pulled out it zipped into her space. The Ford wasn't content to admit defeat and continue its search, however. Its driver waited until the owner of the Civic got out of his car, and shouted a few choice obscenities before continuing on his way.

It's a true story — and one that many students have experienced. The lack of parking is a serious problem on campus, and it's not going to get any better in the near future.

"Parking is tight this quarter, but Winter Quarter is always the most critical," explained Executive Dean Doug Gerard. "That's just a fact of life."

More daily permits in addition to regular parking permits are sold Winter Quarter because of rainy weather and the times that classes are offered.

"We have a higher percentage of students on campus during the prime time hours," Gerard said.

The parking situation has gotten worse every year for a simple reason, he said — more students are competing for the 4,472 student spaces on campus.

Last summer a temporary parking lot was constructed near the Ornamental Horticulture Unit which provided an additional 429 spaces. It was thought that would alleviate the parking situation, Gerard said, but when Fall Quarter rolled around the lot filled right up.

"The students plotted against us and brought more cars," he said with a laugh.

Gerard said that a possible explanation for the increased number of cars is more selective Cal Poly admission requirements. Tougher requirements usually mean higher income students, who are more likely to own cars.

MARGARET APODACA/Mustang Daily

Students are often ticketed for parking where there is no parking place. One reason is lack of sufficient parking.

"I can't think of anything else, quite frankly," he said.

The number of quarterly parking permits is controlled because it's felt that if people buy a permit they should have a reasonable chance of finding a parking space. A problem, however, is that the number of daily permits isn't limited.

That can cause problems on rainy days and during the morning hours, said Gerard. "That's the one soft spot in our armor."

In Fall Quarter of 1983 a total of 6,142 student parking permits were sold for the 4,046 spaces available. That translated to 1.51 permits sold for each parking space.

Money from the sale of parking permits goes to a parking fund that is shared by the 19 campuses in the CSU system.

As far as short-term solutions go, there isn't much to look forward to, said Gerard. No new parking lots that would result in an increase in the total number of spaces are planned this year.

Instead, it's necessary to focus on long-term solutions including multi-level parking garages, said Gerard — something that is somewhat out of the hands of the administration.

Parking garages across the street from the library and across the street from Sierra Madre Hall are included in the Cal Poly master plan. The average cost of a parking space in a parking garage is \$5100, while the average cost of an average surface space is \$780.

The Chancellor's Office, which administers the parking fund for the 19 campuses of the CSU system, has taken the position that a campus must follow its master plan and build parking lots on flat land before it can build multi-level parking structures. Other campuses such as San Diego State have a limited amount of space for parking lots, so it receives money for parking garages before campuses like Cal Poly, which still has flat land to develop.

To satisfy the conditions of the Chancellor's Office, the Sheep Unit, the temporary baseball field and the construction yard across from Fisher Science Hall have to be paved over before the university is eligible for money for parking garages.

The problem is that the buildings at the construction yard including the State Receiving Warehouse would have to be moved, along with buildings at the Sheep Unit, and there's no money available from the state to do that.

"We're sort of caught in the horns of a dilemma," Gerard said.

Another problem is that paving over the temporary baseball field would leave the university with no baseball facilities.

"Sooner or later we're going to have to come to a decision for the project that does the most good for the greatest number of people," Gerard said.

Athletes can get scholarships next year

By JOHN BACHMAN
Sports Editor

President Warren J. Baker has lifted restrictions on athletic scholarships, the new athletic director announced Thursday.

Kendrick Walker

Coaches can now give incoming athletes scholarships.

Scholarship limitations were originally placed on the Athletic Department after it went into debt last November for more than \$300,000. But, a new booster club has convinced Baker the department can stay out of debt without cutting scholarships.

The new booster organization, SUMAT (Supporters of Mustang Athletic Teams), promised Baker it can raise enough money to allow the Athletic Department to operate without cutting scholarship funding, said Athletic Director Kendrick Walker.

Baker froze the Athletic Department scholarships in the fall at \$150,000 when the program had to be bailed out by the Foundation. The Athletic Department requested \$280,000 for scholarships in the 1985-86 school year, and an administration commission recommended a 20 percent cut in the scholarship

program, which would have eliminated money for incoming athletes.

SUMAT was established to raise money statewide for Poly athletics. Its goal is to raise \$250,000, said the Vice President of University Relations James Strom. Half the money would be raised by the Mustang Booster Club and the other \$125,000 by new booster groups established under SUMAT.

If SUMAT's goal is met, the Athletic Department will have enough money to recruit new athletes.

Coaches have praised the move by the administration. "The administration and people involved in athletics are on the same page," said Mike Wilton, women's volleyball coach.

"It seems like a new environment," he added. "We're pretty darned pleased with what has happened."

SUMAT will have to give \$130,000 in promissory notes (deposits that won't be cashed if SUMAT stays out of debt) to the Foundation to guarantee the Athletic Department will not have to be bailed out again for going into debt. If SUMAT fails to raise the money to pay for the scholarships, the notes will be cashed by the university.

Baker approved the plan early this week, said Walker. "The minute he accepted it, the enthusiasm in (SUMAT) soared."

"The good news is we have a reprieve," said Walker. It is now up to the group to come through on its pledges.

The group needs to turn over 26 \$5,000 promissory notes by March 1, Walker said. It also needs to begin raising the \$125,000 for the scholarship fund. One-third of that amount

Please see SCHOLARSHIP, page 3

Who's really in control?

"Personally, I apologize for insulting you in any way. I think I speak for the majority of senators," said Student Senate Vice Chair Mike Mendes.

Mendes publicly apologized to the Foundation Wednesday night at the Student Senate meeting for ASI President Kevin Creighton's pointed questions last week about Foundation financial operations.

Creighton asked the Foundation director at the Feb. 6 Senate meeting to explain some vague financial operations of the Foundation, questions Director Al Amaral evaded or made excuses about. The discussion was reportedly a heated one.

This week the Senate is apologizing for insulting the director and the Foundation. They are sorry to have questioned authority and to have created controversy.

The Senate is not apologizing, what it is doing is giving the Foundation free reign to do what they want without the fear of being checked up on.

"We have confidence in you, we have confidence in the Foundation. We should be more concerned with our internal affairs," Mendes continued Wednesday night.

What internal affairs are more important than what is done with student-earned money? Also, how can they have confidence in an organization that directly affects students when the director has tendencies to evade questions?

Instead of having confidence in the Foundation, they should be outraged.

Are they worried Amaral may tell their teachers to give them bad grades? Or maybe they feel it is their duty to make sure those in authority get away with as much as they can.

We're not saying the Foundation is mishandling its finances. That has not been proven. However, if there is a question, shouldn't it be asked? And when it is asked and no satisfactory answer is given, should the Senate apologize for daring to ask the question?

Common sense gives us the answer to these questions. Common sense is something the senators don't seem to have.

The student representative to the Foundation, Lori DeMatteis, said that the Senate *should* ask questions and that the Foundation wasn't insulted. The Foundation wants the interest, she said.

Though the organization that was receiving the criticism says it wasn't offended, the Student Senate still felt it had to apologize. It is so afraid of a conflict that it ignores what could be a significant student issue.

Senators were elected to represent students. Something it seems they have forgotten.

Senate Chair Marcia Godwin said to an ASI reporter that most of the senators did agree with what Mendes was saying. She also said the senators are sick of talking about the Foundation and want to move to other issues.

What is more important than where student money goes?

If you can't stand the heat, get out of the kitchen. If senators can't stand a little controversy, maybe they should give up their posts as student representatives and let someone who wants to represent the students take their place.

Instead of a democracy, senators are creating a dictatorship with the those in authority at the helm and the Senate playing the part of the peasants.

Letters

VW driver may deserve damage

Editor

This is in response to the article on car vandalism in Tuesday's (Feb. 12) edition of *Mustang Daily*. More specifically, the VW Rabbit mentioned in paragraphs six and seven.

I recall seeing that car Sunday morning, obviously the day it was vandalized. I think the owner failed to mention that his or her car occupied two spaces. Granted, this is no basis for vandalism. But, I myself happened to have owned a VW GTI and now I own an \$11,000 car and I don't have the nerve to take two spaces. It's incredibly irritating to see a car take two

spots when there is an entire lot of spaces. And when I have to drive 1/4 mile to an out-of-the-way spot because some inconsiderate person is afraid of a door ding, I feel the urge to do something myself sometimes. I am sympathetic to the person for the damage done to the car, but on the other hand, maybe he or she will be a little less selfish next time and think before taking up two spaces. I myself have not received a single door ding or scratch yet.

I would appreciate an editorial response emphasizing this point.

Todd Rankin

Proposal to Foundation director

Editor:

Hey Director Amaral I've got a great idea for a perpetual motion machine. Just need \$300,000 to build it and understand that you have a problem with excess retained earnings loops, non-operating expenses. We should get together — the paper model works great!

Scott Huerta

PARKING

From page 1

MARGARET APODACA/Mustang Daily

Students park illegally because there are no other places to park on campus.

Other alternatives that have been discussed include prohibiting freshmen in the residence halls from bringing cars to school, and not issuing parking permits to people who live within a half mile of campus. That could create a whole new set of problems, including vacancies in the dorms because freshmen wouldn't want to live there without their cars and students putting down fake addresses on their CAR forms, said Gerard.

State leader calls for delay in tax cut

SACRAMENTO (AP) — Senate Minority Leader Jim Nielsen said Thursday that the state should delay a tax cut past 1986 if it appears to be an election-year ploy to get votes. "If it smacks too much of a political thing, let's put it on the back burner... and put it over until after the election," Nielsen said at a press conference.

This fiscal year June 30 with a \$1 billion surplus. If some economic forecasts are correct, the state could end the next fiscal year with a \$2.2 billion surplus. Nielsen, R-Woodland, and a number of other legislators support the idea of giving taxpayers a rebate if the budget surplus gets too large. But he said he would favor delaying such a cut if it gets caught up in political charges.

There has been speculation that Republican Gov. George Deukmejian might try to engineer a 1986 tax cut to improve his re-election chances. Nielsen said he didn't to see the chances for a tax cut hurt by "somebody charging that you politicians are doing it for election purposes."

Engineering Week, contests and demos

By MARC MEREDYTH
Staff Writer

Next week is Engineering Week at Cal Poly in honor of the birthday of the first president of the United States, an engineer by trade, George Washington. To celebrate Engineering Week most of the engineering clubs at the university will be participating in a promotional forum in the University Union Plaza on Tuesday and Thursday from 11 a.m. to 12 p.m. Highlights at the forum will include a glass cylinder engine, presented by the American Society of Mechanical Engineers, that allows the observance of internal combustion in an engine, a bridge building contest sponsored by the Society of Civil Engineering and an ice melting contest held by the Society of Women Engineers.

The contest involves students guessing how long it will take a 20 pound block of dry ice to melt. Guesses are 50 cents each and the prize is a Hewlett-Packard 11C calculator, donated by El Corral Bookstore. Associate Engineering Dean Gustav Wassel said the week will conclude Friday night with the annual Engineering Banquet, which will be held at Trader Nicks. Wassel said the banquet is \$12 and tickets can be obtained at the engineering deans office. The banquet will feature R. P. Caren as speaker. Caren is Vice-president and Assistant General Manager of Research and Development for Lockheed Missiles and Space in Palo Alto. Caren will discuss research and development in engineering and its importance for the future. Wassel said all students and faculty are invited.

SCHOLARSHIP

From page 1

needs to be raised before September. The second third will need to be raised by December, the final third by March. The group has verbal commitments for many of the notes, said Walker.

Both Strom and Walker said they didn't think it would be any problem raising the money for the notes, but added that raising the \$125,000 will be a challenge. "If we can make it this year," said Strom, "we will be in good shape."

SUMAT's board will have as many as 30 people. Baker will appoint four members, two people will come from local boosters, as many as eight will be from statewide booster groups, nine will be appointed at large and

one from each of the scholarship sports.

Walker pointed to the work of football coach Jim Sanderson, Strom and former Athletic Director Richard Heaton in establishing SUMAT.

The new booster group, he said, is a lot like the one established at Clemson University in South Carolina, which raised over a million dollars last year.

The local boosters will still remain independent, stressed Strom. "We needed to coordinate the fund raising activities of volunteers. SUMAT is one way to do that."

Crackdown on computer hackers starts Sushi sickness possible

STANFORD, Calif. (AP) — A high school sophomore Wednesday became the first person to be cited under California's new law against computer trespassing for his alleged attempt to crack Stanford University's system with a home computer, authorities said.

The 15-year-old, whose name was not released, was cited for an infraction, similar to a traffic ticket, and was not formally arrested, according to Santa Clara County Deputy District Attorney Doug Southard.

The new law, which went into effect Jan. 1, could have allowed the charge to be considered a misdemeanor with a penalty of up to six months in jail and a \$500 fine for adults.

"Stanford did not have evidence of what the boy wanted to do" in trying to get into the university's computer system, said Stanford spokesman Joel Shurkin. "However, he was attempting unlawful access of a computer."

The suspect was one of three Homestead High School whiz kids who allegedly matched wits with one of nation's largest computers and came close to cracking the complex security system.

Officials at the school, which buys access to the Stanford system, changed their secret password when they became suspicious of a high number of unauthorized attempts to locate it that showed up on a security printout.

The suspect who was cited admitted to police that he forged a key to his school's main office, where he found the password to his school's grade file, according to Sheriff's Deputy Ron Levine.

The youth was arrested Jan. 18 for trespassing into the office and he was suspended from school pending a disciplinary hearing later this week.

A second student was suspended for three days last week for allegedly helping to locate the password, and a third student has been implicated in the actual hacking, or attempt to break into the Stanford system.

Stanford officials said they will pursue prosecution of all suspects to deter future attempts to invade the computer system.

CHICAGO (AP) — Sushi may be savory, but people who eat the raw fish are at risk of acquiring parasitic worms that can cause sharp abdominal pains, Japanese doctors say.

The worms have to be removed with forceps stuck down the patient's throat and esophagus into the stomach.

But this condition is rare in the United States despite the increasing popularity of sushi, said Dr. Robert Fontaine of the Centers for Disease Control in Atlanta.

Fontaine said the first case in the United States of roundworm attaching itself to the stomach and being pulled out with forceps in a treatment known as endoscopy was reported last year in Hawaii.

If the worm is not removed, Fontaine said, symptoms can occur similar to ulcers or inflammation of the stomach lining, but they eventually would disappear.

These symptoms, Fontaine added, caused problems many years ago because they were mistaken for ailments such as appendicitis, and in some cases, exploratory surgery was done.

Good friends won't leave you flat.

1984 Beer Brewed in U.S.A. by Miller Brewing Co., Milwaukee, WI

The moon was up, the stars were out and—pfft!—your rear tire was down. Good thing there was a phone nearby. And a few good friends who were willing to drive a dozen miles, on a Saturday night, to give you a lift. When you get back, you want to do more than just say "thanks." So tonight, let it be Löwenbräu.

Löwenbräu. Here's to good friends.

A close look at the brain of Einstein

BERKELEY (AP) — Albert Einstein's brain had more support cells than the average person's, according to an anatomy professor who studied four "very, very exciting" chunks of it.

"It was rather an overwhelming feeling," said Marian Diamond of the University of California. "There I was, looking at the brain that came up with the theory of relativity."

Ms. Diamond thinks she knows why Einstein was so smart, but she's not sure.

She notes there are two types of brain cells: glial cells or "support cells" that supply nourishment and do the mundane chores of the brain like running the cerebrum, and neurons, which do the thinking.

In the left portion of Section 39 of Einstein's brain, Ms. Diamond said she found more glial cells for every neuron than there are in Section 39 of the average brain — 73 percent more.

"No one knows how cells think," said Ms. Diamond. "It's a mystery."

She said she couldn't be sure what her findings mean because the brain is 30 years old.

"Either Einstein had larger neurons, or his neurons had more processes that needed more support," the professor said.

She said she chose to do the study after seeing a picture of Einstein's preserved brain in an old journal. Ms. Diamond published her study in the current issue of Science magazine.

The four small parts of the brain were obtained from a Missouri pathologist who conducted the autopsy on Einstein in 1955.

It took her three years to obtain the pieces of the brain. Once she got them, Ms. Diamond said she sliced them into cross-sections and started counting cells.

Knowing that the average man has 1,936 neurons for every glial cell in Section 39 — the part of the brain that is responsible for the deepest thinking, she was surprised to find a different ratio in Einstein's brain.

The professor has studied the neuron-glial relationship in rats for many years and previously found that rats in big, roomy cages with lots of treadmills and other toys develop lower neuron-glial cell ratios.

She said, however, that any similarity between Einstein and her rats ended there.

Ms. Diamond isn't sure exactly where her four pieces of Einstein's brain are now. Pointing to her lab, where the walls are covered with jars of rat and human brains, she said: "Somewhere in there ... I'm not exactly sure what we did with it."

Honors go to local inventors

By MARC MEREDYTH
Staff Writer

The 1984 Inventor of the Year was selected Wednesday at the San Luis Obispo Chamber of Commerce for his invention of a handle and reseal for large soft-drink bottles.

Hugh Beekes of Arroyo Grande won the fourth annual inventors contest which had seven participants, including a 1983 Cal Poly graduate. The four judges made their decision after the entrants made a five minute presentation and answered questions about their product.

By the rules of the contest, entries had to be production-ready or in an advanced prototype stage, and made by a resident of San Luis Obispo County.

Karen Bates, communications specialist for the Chamber and a Cal Poly journalism student, said the contest honors the creators of new products which will both add to the vitality of the Central Coast and contribute economically to life here.

The judges, who included Assistant Professor Art Dickerson of the Cal Poly Electrical and Electronic Engineering Departments, chose Beekes as winner

from a list of inventions that included a Bathroom Butler, the Romantic Bone, the Golden Shoulder Camera Support System and the Qwikset Target.

Beekes was selected as the winner because his bottle handle was practical, allowed a sound profit margin, addressed a wide market and would produce employment on the Central Coast.

One of the most interesting inventions was entered by Luawanna Hallstrom, a 1983 Nutrition graduate from Poly. Presently working for Hannon-Sampley Chiropractic as a chiropractic assistant, Hallstrom presented the Romantic Bone.

She said she got the idea from the old cliché "they haven't a romantic bone in their body." Hallstrom's husband had been accused of this, she said, so she came up with an idea in a dream of making a romantic bone to give to loved ones who may have forgotten the need for romance in a relationship. Hallstrom said it took her a year and a half to make the bone and market it.

Beekes said his handle and reseal could be operated with one hand, which he demonstrated on two and three liter plastic sodapop bottles. He said the product cost about 75 cents to manufacture in quantity and would sell for \$2 to \$2.50 retail. Safeway had already expressed an interest in the handle, Beekes said.

Honorable mentions were awarded to Valerie Ann St. Vincent Young, Atascadero, for her Abductor Turntable and to Harold Molsenbocker, also of Atascadero, for his Qwikset Target.

The judges created an additional award, Inventor Emeritus, to honor 75-year-old William Hotine of Los Osos, who has over 30 patents to his name and created an Improved Bi-phase Digital Modulation System for the competition.

The competition is held in conjunction with National Inventors Month, celebrated nationwide in February.

MARC MEREDYTH/Mustang Daily

Luawanna Hallstrom, a 1983 Nutrition grad, shows off her Romantic Bone. She was one of eight local inventors who entered the Chamber of Commerce Inventor of the Year Contest held last Wednesday.

THE FINAL TEST

Narrowing your list of prospective employers down to the one that's right for you is no easy task, especially when you want a challenging, fast-moving job with a growing high-tech company. Which do you choose?

Microsource understands. Because from concept to final test, our microwave components and systems for communications, instrumentation and defense applications face the most demanding expectations. And, they deliver.

Now, we're inviting you to put Microsource to the test. Stack our technologies and our amenities up against any other...

- Rapid growth, decision-making opportunities.
- Results-oriented engineering teams.
- Stable, successful environment.
- Affordable, quality Northern California wine country living.
- Excellent compensation and benefits.

We believe bright, inquisitive minds should have the freedom to chart a progressive course of development. And with our balanced marketing approach, the long range possibilities are excellent.

Put us to the test. Give us a call, or send us a resume stating your educational, project or job experience. Microsource, Inc., 345 Tesconi Circle, Santa Rosa, CA 95401. Attn: Bob Austin. (707) 527-7010. Equal opportunity employer.

Rodeo seas Cal Poly's t

By SANDRA THORNBURGH
Staff Writer

Bronc riding, steer wrestling and barrel racing are some of the events scheduled for the Western division of the National Intercollegiate Rodeo on Saturday and Sunday, Feb. 16 and 17, in Cal Poly's campus arena.

Competition in the 1984-85 season's seventh rodeo will begin at 2 p.m. on Saturday and 10 a.m. on Sunday and is free to the public.

Although the Cal Poly men's team is ranked number one in the nation and the women's number three, staying ahead of competitors has not been as easy as it was last year.

"The competition is tougher this year, especially from Coal-inga's West Hills College, so we don't have as wide a margin as last year," said Coach Ralph Rianda. "Hartnell and Merced are right on the tails of the women's team," he added.

Rankings are based on the points scored in the best five rodeos, Rianda said. After the first five rodeos, the lowest one is thrown out.

"Ratings get very complicated after the first five rodeos because you never know which competition the other teams is throwing out," explained Rianda.

Six men and three women are designated to score points for the Cal Poly teams but individual participants can score for themselves.

son begins Saturday, teams ranked high

"The teams are selected on the basis of total accumulative points that each individual has earned throughout the season," Rianda said, "so everybody's got the same shot of being on the team."

For the upcoming rodeo, the men's team includes: Steve Nilmeier, Tony Currin, Rocky Carpenter, Allen Gill, Nolan Twisselman and John Bell. Women's team members are Wendy Monchamp, Leah Garcia and Connie Madonna.

Carpenter, a senior from Anderson who won the NIRA national team roping championship last year, is ranked number one in the nation for team roping. Nilmeier is first in the nation for

calf roping, third in the all around and fifth in steer wrestling.

Monchamp, a sophomore from Montague and the 1984 national champion in breakaway roping, is ranked first in breakaway and fifth in the all around for the upcoming competition.

Additional teams competing in the regional rodeo are from Cal State Fresno, the University of Nevada at Reno, and Pierce College of Woodland Hills.

Following the season, which ends in May, the top two teams in both men's and women's divisions and the top two individuals from each region are selected to go to the National Intercollegiate Finals in June.

ents perform in Fresno

A dramatic production directed by a speech communications faculty member opens this weekend in Fresno.

Dr. Gail Miller is directing seven Cal Poly students in scenes from different Judy Blume novels. Blume is a controversial children's author whose novels frequently depict topics like sex, drugs and religion in the lives of children and young people.

The production will be featured as part of a panel called "Sex, Drugs, and Religion: Taboo or Totem for Performance?" at the 1985 Western Speech Communication Association convention on Feb. 18.

Students who will be participating in the production are Mark Cornell, freshman, English; Angela Cavalli, junior, speech; Alan Raze, sophomore, speech; Traci Bender, sophomore, liberal studies; Stacy Perenon, freshman, social science; Rosemary Somogyi, junior, speech; and Shelby Tocher and Trina Pifferini.

Miller said the production will probably come to San Luis Obispo in the near future, but no definite date is set yet.

Some of Blume's novels that are included in the performance include *Are You There God? It's Me, Margaret* and *Tiger Eyes*.

Poly ag students learn by doing by teaching

By LESLEY GLEASON
Staff Writer

Some say that the best way to learn something is to attempt to teach it to some one else. In that vein, one Cal Poly department has changed "learn by doing" to "learn by teaching."

Cal Poly students are getting hands-on experience as tour guides for the Cal Poly Agriculture Department.

Last year over 75 tours were given for about 2,400 people, ranging from kindergarteners to university students.

Most tours last about 2 hours and take groups to specific areas as requested. The most popular tour with children is of the animal units where they can see horses, cows, pigs, sheep, and chickens.

One challenge of giving a tour to children is learning to make explanations they can easily understand. Children get to pet calves, and, on occasion, have seen a calf being born, in addition to petting lambs and piglets and handling baby chickens with assistance from the poultry

manager.

Dairy science major Kevin Gonsalves gave about 15 tours last year and has given four so far this year. "I give tours because I like to help out the school," said Gonsalves. "I like the older kids now. I am getting to the point where the younger kids are getting too hard to handle."

One recent tour conducted by Gonsalves included about 20 first and second graders from the Grace Christian Academy of Paso Robles. His goal for the tour was for the children to go home with a basic understanding of agriculture.

"I like the children," said Victor Anaya, a natural resource management major, who assisted Gonsalves on the tour.

"This is where we take cows and get milk from them," explained Gonsalves when the children arrived at the Dairy Unit.

While the group of children observed a newborn calf, not yet old enough to stand up, Gonsalves spoke to the children with a special touch while explaining that even at birth, calves weigh more than second graders.

"That calf can't drink all that milk the cow is going to produce so someone will come in with a machine and take that milk from the cow. After this afternoon the calf will never see it's mommy again," said Gonsalves to his young listeners.

After Gonsalves explained the separation of mother and calf, a child asked, "Why do you take them apart?"

"So the mom can give us the milk to drink," Gonsalves replied.

Another child added, "Do you kill them when you take them apart?" Gonsalves explained that no, they did not.

"Today I have learned that sheep are born with tails. I thought they were born only

with those little things," said Mary Bently a mother of one of the children who did not know the tails of sheep are cut at the age of about three weeks.

"I learned that baby pigs could be laid on and survive. And I did not know you could pull calves away from their mom that early," said Laurie Cassara, another mother of one of the children.

One child said the tours were fun because he didn't have to take a spelling test or do any work. Another said she learned that milk comes from cows.

"I enjoyed watching the piglets fight over eating. I think that is something the children don't see. They also enjoyed seeing the calves and having them suck on their fingers," said Paula Free, a teacher at the Grace Christian Academy.

Hoopsters look to snap long losing streak

Men tackle two tough opponents at home, have lost seven straight

By DAN RUTHEMEYER
Staff Writer

The men's basketball team will go up against two strong conference opponents this weekend, looking to snap its seven game losing streak.

Playing Cal State Los Angeles and Cal State Northridge, the Mustangs will be minus the services of forward Derrick Roberts and possibly forward Nate Hatten.

While Roberts has sat out the last several games with a rib injury, a bad back has kept Hatten from practice this week.

Although Hatten hasn't been able to work out with the team, there is still a chance he may see some action over the weekend.

"We're hoping Hatten will be well," said coach Ernie Wheeler. "It's a day to day thing with him."

In any case, the Mustangs will take their 2-7 conference record out onto the floor Friday when they play Cal State Los Angeles.

The Golden Eagles, who are 6-3 in conference and 13-9 overall, boast a strong front line that in-

cludes 7-1 freshman Art Wallace, 6-9 Tony Brown and 6-8 R. Anthony Boyer.

Complementing the monstrous inside attack is guard Sam Veal who is the leading scorer in the conference at 22.4 points a game.

Also scoring big for the quick-tempoed Golden Eagles is Shawn Holiday who tallies an average of 10.1 points and Brown who nets 8.9 points.

In their previous meeting this year, Los Angeles beat the Mustangs 43-36. The Golden Eagles kept the score low by gaining the lead and then holding the ball for five and a half minutes.

Wheeler expects that if Los Angeles takes a lead Friday, they will again pull the ball out and run time off the clock.

When the Mustangs play the 7-2 Matadors of Northridge on Saturday, they will be going up against the team that started the current Cal Poly seven-game losing streak. That game was played on Jan. 18 and the final score was 66-45.

Topping the list of Northridge

DARYL SHOPLAUGH/Mustang Daily

Poly head coach Ernie Wheeler is suffering his worst losing streak in his 13 years here.

scorers is guard Mike Almeida whose 12.8 points a game make him the fifth leading scorer in the conference. Forward Larry White also adds to the Matador scoring attack with 12 points an outing. Guard Mike Lopez contributes 10.7.

Winning their last game decisively by a score of 78-63, the

Matador offense is based on fine outside shooting and a good passing attack.

While the Mustangs have dropped the last seven games, all but one have been lost in the last 30 seconds with one defeat coming in overtime.

Wheeler said that he really isn't concerned about the way his

opponents play, but how the Mustangs execute their offense.

"We've got to stop turnovers and start maximizing our opportunities," said Wheeler.

Friday's game against Los Angeles will start at 7:30 p.m. while Saturday's tipoff will be at 8:05 p.m.

Is There Life After Graduation?

At Avantek, yes. Because your learning continues when you join the innovators of microwave technology.

Avantek has been the premier company in solid state microwave technology since 1965. Our achievements in microwave components, equipment, and systems are known for excellence and quality. In microwave satellite and point-to-point communications, TVRO, cable television testing systems, and defense electronics, Avantek has an enviable reputation.

Besides the challenge of working in the rapidly growing microwave field, Avantek offers an outstanding location—Northern California—and compensation package. Benefits include cash profit sharing; employee stock ownership; a 401(k) savings program; tuition assistance; and a personal computer discount financing program.

If you're about to graduate with a degree in Electrical Engineering/Electronics; Computer Science; Chemical Engineering; Industrial Engineering; or Physics, why not find out about the prospects for *you* after graduation with Avantek? We'll be at Cal Poly on Friday, March 1. Sign up for your interview at your Placement Office now. Or, send your résumé to S. Marrero-Johnson, Manager, College Relations, Avantek, Inc., Dept. CPI, 3175 Bowers Avenue, Santa Clara, CA 95051. An equal opportunity employer. Permanent residency visa required. Some positions require U.S. citizenship.

CAL POLY

YES!

"Avantek has given me a lot of responsibility in a very technically advanced environment. It's an atmosphere of exciting technical projects, rapid responsibility, and quick learning."

—Richard Fornes, Process Engineer/R&D
California Polytechnic Institute '82

Avantek

Women head north, face hard competition

One gymnast injured, but another is returning for the road meets

KEVIN CANNON/Mustang Daily

Junior Sue Cothorn and teammates are on the road this weekend, returning home on Feb. 22.

With one of its top gymnasts hurt, the women's team head north today for a meet with Division I San Jose State.

The tough San Jose team and Chico will be in the meet, and the Poly head coach said the Spartans will be tough competition.

"They (San Jose State) are Division I," said head coach Chico Rivera. "All the girls are on scholarship."

Before coming to Poly, Rivera coached at Chico.

"I coached that team for four years. We're ranked above them regionally."

Chico is No. 6 in the Western Region, the Mustangs No. 5. Poly should be ranked around No. 20 in the country, said Rivera.

One of Rivera's top gymnasts was hurt in a recent practice.

Suzey Ingersol broke her foot doing a routine dismount, said Rivera. He wasn't sure how long she would be out.

The Mustangs will get Paige Allan back for the meet, she has been out injured and was scheduled to return last week, but a flu

keep her from returning.

Allan is rated No. 11 in the all-around in the region, behind teammate Jana Lehman who is ranked No. 10.

Ingersol was rated No. 16 before she was hurt.

Poly has two meets this weekend, going against UC Davis on Saturday.

The women will host UC Santa Barbara and Cal Poly Pomona on Feb. 22 in the Main Gym, 7 p.m.

The Mustangs are now 8-6 in dual meets.

It set a season record last weekend by hitting 41.00 on the balance beam, placing second at Sacramento State and sixth in the Chico Jamboree.

In the Sacramento meet sophomore Lehman was third in the vault (8.6), and Cathy Pagani was third on the balance beam (8.2).

In the Chico meet, nine schools competed, with Poly sixth at 161.20 points.

Lehman was the only Mustang to place in the top five.
